To Whom It May Concern,

This letter of recommendation is given to **Ms. Gloria Gutierrez Quintero** after having her as a student who took my three classes: C++ and C# programming as well as Database Analysis and Design.

Gloria exhibited the best qualities of a motivated and a self-sufficient student. She studies computer programming and databases using all the available college resources, including class discussions and professor's consultations. Still, Gloria also utilizes the knowledge from available online sources.

Ultimately, her attention to detail, attention to the given instructions and project requirements pay back well. She is capable of performing well in multiple classes resulting in the perfect GPA 4.0.

I know that Gloria works well in a team environment. She will also bring her real-life experience since she has several years of successful work experience in different industries.

I recommend Gloria most highly for any scholarships she is applying for and for internship roles matching her qualifications. She has good skills and motivation for success. I am confident that she will continue being an excellent student in her advanced studies and a valuable asset for the team she will be joining as an intern.

Please feel free to contact me if you have any questions.

Cordially,

Ted Volk  
Faculty Member and Coordinator  
Computer Science Department  
North Hennepin Community College
